

THE MEMORY HACK PROMPT

The exact prompt from the video that converts a conversation history into a Skill.

The prompt (copy-paste ready):

Analyze everything we've discussed — my preferences, workflow, feedback, what I liked, what I rejected, my tone, structure, formatting rules. Then use the skill-creator to build a Skill that captures all of it. Build the full SKILL.md with proper metadata plus any reference files. Run the eval to test it.

THE VOICE-TO-SKILL PROMPT

Template for converting a voice note transcript into a Skill.

The prompt (copy-paste ready):

Use the skill-creator to build a skill based on this workflow description: [PASTE YOUR TRANSCRIPT HERE]

Record a 2–3 minute voice note explaining any repeatable workflow. Transcribe it using Claude's audio input, Whisper, or your phone's native transcription. Paste the transcript above.
